Ministry of Health, New Zealand
Ministry of Consumer Affairs, New Zealand
Safe Food New South Wales
Sisters of Charity Health Services
Steritech
St Vincent's Private Hospital, Sydney
System Innovation in Health
University of Queensland
University of Sydney

Additional interests participating in the preparation of this Standard:

Australian Infection Control Association
Australian Institute of Environmental Health
Australian Society for Infectious Diseases
Australian Society of Microbiology
Canberra Hospital
Institute of Hospital Engineering
Queensland Health
Royal Australian Institute of Architects

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Australia web site at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Australian Standard*, has a full listing of revisions and amendments published each month.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.com.au, or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.
