

# Standard Specification for Helmets Used in Skateboarding and Trick Roller Skating<sup>1</sup>

This standard is issued under the fixed designation F1492; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon ( $\epsilon$ ) indicates an editorial change since the last revision or reapproval.

## 1. Scope

1.1 This specification covers performance requirements for helmets to be used in the activities of skateboarding and trick roller skating.

1.2 All testing and requirements of this specification shall be in accordance with Test Methods F1446, except where noted herein.

1.3 *Partial utilization of this specification is prohibited. Any statement of compliance with this specification shall be a certification that the headgear meets all of the requirements of the specification in their entirety. A headgear that fails to meet any one of the requirements of this specification is considered to have failed the specification, and shall not be sold with any indication that it meets parts of the specification.*

1.4 This standard is subject to revision at any time by ASTM. It must be reviewed every five years and if not revised either reapproved or withdrawn. References to the standard must include the version date. No references to a version that has been replaced or withdrawn shall be placed on any product or its packaging manufactured more than 24 months after the effective revision or withdrawal date. Go to [astm.org](http://astm.org) to verify the latest version of this standard.

1.5 The values stated in SI units are to be regarded as standard. No other units of measurement are included in this standard.

1.6 *This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety, health, and environmental practices and determine the applicability of regulatory limitations prior to use.*

1.7 *This international standard was developed in accordance with internationally recognized principles on standardization established in the Decision on Principles for the Development of International Standards, Guides and Recommendations issued by the World Trade Organization Technical Barriers to Trade (TBT) Committee.*

<sup>1</sup> This specification is under the jurisdiction of ASTM Committee F08 on Sports Equipment, Playing Surfaces, and Facilities and is the direct responsibility of Subcommittee F08.53 on Headgear and Helmets.

Current edition approved June 15, 2022. Published July 2022. Originally approved in 1993. Last previous edition approved in 2015 as F1492 – 15. DOI: 10.1520/F1492-22.

## 2. Referenced Documents

2.1 *ASTM Standards:*<sup>2</sup>

F1446 Test Methods for Equipment and Procedures Used in Evaluating the Performance Characteristics of Protective Headgear

## 3. Terminology

3.1 *Definitions of Terms Specific to This Standard:*

3.1.1 *trick roller-skating, n*—aggressive roller skating using quads or in-lines and involving such things as jumping, sliding sideways, or skating on ramps or stairs.

3.1.2 *in-lines, n*—roller skates with all wheels on each skate arranged along a single longitudinal line.

3.1.3 *quads, n*—roller skates with four wheels on each skate arranged in a rectangular pattern.

## 4. Labels and Warnings

4.1 Shall meet the requirements of Test Methods F1446.

4.2 Shall have the words “For skateboarding or trick roller skating” inscribed on one of the interior permanent labels.

4.3 Headgear that complies with this and other standards may proclaim uses as certified by the manufacturer.

## 5. Marking the Test Line

5.1 The test line is shown in Fig. 1 and shall be marked in accordance with Test Methods F1446.

## 6. Conditioning and Number of Samples

6.1 Shall be in accordance with Test Methods F1446.

6.2 The test requires a minimum of four samples of each shell/liner combination.

## 7. Retention System Testing

7.1 Retention system tests shall be performed before impact testing.
