

Designation: F1861 – 21

Standard Specification for Resilient Wall Base¹

This standard is issued under the fixed designation F1861; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ϵ) indicates an editorial change since the last revision or reapproval.

1. Scope

1.1 This specification covers resilient wall base. These products are manufactured from rubber or thermoplastic materials, or a combination thereof. Wall base is used to provide a functional, as well as decorative border, between walls and floors. This specification does not include rigid products.

1.2 The values stated in inch-pound units are to be regarded as the standard. The values given in parentheses are for information only.

1.3 The following safety caveat pertains to the test methods portion, Section 12, of this specification: *This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety, health, and environmental practices and determine the applicability of regulatory limitations prior to use.*

1.4 *This international standard was developed in accordance with internationally recognized principles on standardization established in the Decision on Principles for the Development of International Standards, Guides and Recommendations issued by the World Trade Organization Technical Barriers to Trade (TBT) Committee.*

2. Referenced Documents

2.1 The following documents of the issue in effect on the date of the material purchase form a part of this specification to the extent referenced herein:

2.2 *ASTM Standards*:²

- D883 Terminology Relating to Plastics
- D1566 Terminology Relating to Rubber
- D1755 Specification for Poly(Vinyl Chloride) Resins
- F137 Test Method for Flexibility of Resilient Flooring Ma-

¹ This specification is under the jurisdiction of ASTM Committee F06 on Resilient Floor Coverings and is the direct responsibility of Subcommittee F06.80 on Specifications.

Current edition approved April 1, 2021. Published April 2021. Originally approved in 1998. Last previous edition approved in 2016 as F1861–16. DOI: 10.1520/F1861-21.

- ANSI/ASQC Z1.4 Sampling Procedures and Tables for Inspection by Attributes³

3. Terminology

3.1 *Definitions*—For definitions of other terms used in this standard, see Terminology F141.

4. Classification

4.1 *Types*—Wall base shall be of the following types, as specified (see 5.1.2, 6.1, and 7.1).

- 4.1.1 *Type TS*—rubber, vulcanized thermoset.
- 4.1.2 *Type TP*—rubber, thermoplastic.
- 4.1.3 *Type TV*—vinyl, thermoplastic.

4.2 *Groups*—Wall base shall be one of the following groups, as specified (see 5.1.2, 6.2.1, and 6.2.2):

- 4.2.1 *Group 1*—solid (homogeneous).
- 4.2.2 *Group 2*—layered (multiple layers/heterogeneous).

4.2.3 Either group may be specified with any of the types above. It is not necessary to specify group when either is acceptable.

4.3 *Styles*—Wall base shall be of the following styles as specified (see 5.1.2, 6.3, and Fig. 1):

- 4.3.1 *Style A*—straight.
- 4.3.2 *Style B*—cove.
- 4.3.3 *Style C*—butt-to.
- 4.3.4 *Style D*—sculptured.

FIG. 1 Typical Profiles of Wall Base

4.4 *Corners*—Where specified, both inside and outside 90° factory-made corners should be specified by style. Corners must meet the same height and thickness requirements as wall base (see Section 9).

NOTE 1—Factory-made corners and wall base may have visual color differences due to process and material variations. Consult the manufacturer to ensure color acceptability between factory-made corners and wall base prior to ordering.

5. Ordering Information

5.1 Purchasers shall state whether this specification is to be used, select the preferred options permitted herein, and include the following information in the invitation to bid or purchase order:

- 5.1.1 Title, number, and date of this specification,
- 5.1.2 Type, group, and style, (see Sections 4, 6, and 7),
- 5.1.3 Factory-made corners, if required (see 4.4),
- 5.1.4 Color (see 6.2),
- 5.1.5 Quantity: in pieces, linear feet, or cartons,
- 5.1.6 Height required (see 9.1),
- 5.1.7 Thickness required (see 9.2),
- 5.1.8 Length required (see 9.3, 9.3.1, and Section 15),
- 5.1.9 Lot information, if other than as specified in ANSI/ASQC Z1.4, (see 11.1 and 13.1),
- 5.1.10 Sampling, if other than as specified in ANSI/ASQC Z1.4, (see 11.1),
- 5.1.11 Statement requesting certification, if certification of compliance is required (see Section 14),
- 5.1.12 Packing requirements, if other than as specified (see Section 16),
- 5.1.13 Palletization, if required,
- 5.1.14 Marking required, if other than specified (see Section 15), and
- 5.1.15 Other requirements.

6. Materials and Manufacture

6.1 *Materials*—Any polymeric material or combination of polymeric materials is acceptable if, in combination with processing chemicals, fillers, and colorants, the material can be formed into wall base, which satisfies all the requirements of this specification (see 5.1 and 7.1). Other suitable recycled polymeric material may be incorporated as a part of the total polymeric content.

6.2 *Color*—The color shall be as specified in the contract or order (see 5.1.4).

NOTE 2—The colors and styles that are available are indicated in individual manufacturer’s current catalogs. As manufactured, colors may vary somewhat in hue or shade from the catalog.

NOTE 3—Where color match is a concern, obtain current samples from the manufacturer to verify color acceptability.

6.2.1 *Solid Wall Base*—The color shall be uniform throughout the entire thickness of the wall base.

6.2.2 *Layered Wall Base*—The surface color need not extend through the entire thickness of the wall base, but must extend throughout the entire wear layer. Layered wall base shall have a minimum wear layer thickness of 0.002 in. (0.05 mm) when measured in accordance with Test Method F410 and shall not delaminate under normal use.

6.3 *Styles*—The style shall be as specified in the contract or order (see 5.1.2).

6.3.1 *Straight Wall Base*—The exposed surface of straight (toeless) wall base is vertical, as illustrated by the first cross-sectional profile in Fig. 1.

6.3.1.1 *Fit to Wall*—Top return lip of wall base shall fit firmly against the wall when the vertical portion of the cove base is adhered to the wall.
