Natural gas — Performance evaluation for analytical systems

bsi.

...making excellence a habit.™

In addition, the term *generalized least squares* (GLS), is used as the main regression technique to establish unbiased estimates of response functions, replicating robust statistics from BS EN ISO 6143:2006. This was included in an attempt to harmonize standards written by TC/158 and TC/193. Therefore, the committee believes that the reference to *ordinary least squares* (OLS) in **National foreword** is not required, nor is it used elsewhere in the standard.

This British Standard is the UK implementation of EN ISO 10723:2012. It supersedes BS EN ISO 10723:2002 which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee PTI/15, Natural Gas and Gas Analysis.

A list of organizations represented on this committee can be obtained on request to its secretary.

BSI is a public body of the UK, obliged to publish British Standards as a British Standard. However, in the development of this European Standard, the UK committee voted against its approval as a European Standard. © The British Standards Institution 2013

In the published standard, the term *working measurement standards* (WMS) is used to refer to reference gas mixtures. In order to align the vocabulary used in describing natural gas or gas analysis, the UK committee would have preferred to use the term *Secondary Reference Gas Mixtures*, found in BS ISO 7504:2001.

Compliance with a British Standard cannot confer immunity from legal obligations.
In addition, the term *generalized least squares* (GLS), is used as the main regression technique to establish unbiased estimates of response functions, replicating robust statistics from BS EN ISO 6143:2006. This was included in an attempt to harmonize standards written by TC/158 and TC/193. Therefore, the committee believes that the reference to *ordinary least squares* (OLS) in clause 6.6.1 is not required, nor is it used elsewhere in the standard.

EN ISO 10723

December 2012

ICS 75.060

Supersedes EN ISO 10723:2002

English Version

**Natural gas - Performance evaluation for analytical systems
(ISO 10723:2012)**

Gaz naturel - Évaluation des performances des systèmes
d'analyse (ISO 10723:2012)

Erdgas - Bewertung der Leistungsfähigkeit von
Analysensystemen (ISO 10723:2012)

This European Standard was approved by CEN on 30 November 2012.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.
