Rubber hoses and hose assemblies - Rubber-covered spiral wire reinforced hydraulic type - Specification

National foreword

This British Standard is the UK implementation of EN 856:2015, incorporating corrigendum March 2019. It supersedes BS EN 856:1997, which is withdrawn.

The start and finish of text introduced or altered by corrigendum is indicated in the text by tags. Text altered by CEN corrigendum March 2019 is indicated in the text by AC AC.

The UK participation in its preparation was entrusted to Technical Committee PRI/66, Rubber and plastics tubing, hoses and hose assemblies.

A list of organizations represented on this committee can be obtained on request to its secretary.

BSI, as a member of CEN, is obliged to publish EN 856:2015 as a British Standard. However, attention is drawn to the fact that during the development of this European Standard, the UK committee voted against its approval.

This is due to concerns about the abrasion test method detailed in Annex A (normative). It is the opinion of the UK committee that the abrasion test method is not reliable and gives inconsistent results.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
