

Eurocode 1 — Actions on structures

Part 1-6: General actions — Actions during execution

ICS 91.010.30

National foreword

This British Standard is the UK implementation of EN 1991-1-6:2005, incorporating corrigendum February 2013, which consolidates CEN corrigenda July 2008 and November 2012. It supersedes DD ENV 1991-2-6:2000, which is withdrawn.

The start and finish of text introduced or altered by corrigendum is indicated in the text by tags. Text altered by CEN corrigendum July 2008 is indicated in the text by **[AC1]** **<AC1>**. Text altered by CEN corrigendum November 2012 is indicated in the text by **[AC2]** **<AC2>**.

The UK participation in its preparation was entrusted by Technical Committee B/525, Building and civil engineering structures, to Subcommittee B/525/1, Actions (loadings) and basis of design.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

Where a normative part of this EN allows for a choice to be made at the national level, the range and possible choice will be given in the normative text, and a note will qualify it as a Nationally Determined Parameter (NDP). NDPs can be a specific value for a factor, a specific level or class, a particular method or a particular application rule if several are proposed in the EN. To enable BS EN 1991-1-6:2005 to be used in the UK the latest version of the NA to this Standard containing these NDPs should also be used. At the time of publication, it is NA to BS EN 1991-1-6:2005.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard cannot confer immunity from legal obligations.
