National foreword

This British Standard is the English language version of EN 2155-7:1997.

The UK participation in its preparation was entrusted to Technical Committee ACE/62, Aerospace structural transparencies and non-reinforced plastics, which has the responsibility to:

— aid enquirers to understand the text;

— present to the responsible European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;

— monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled "International Standards Correspondence Index", or by using the "Find" facility of the BSI Standards Electronic Catalogue.

NOTE Under the AECMA part numbering system, normative references to the Parts of AECMA-originated European Standards may appear in clause 2 in the form of a three-digit number e.g. -001 where the BSI and CEN systems would use the form -1. It can be assumed that, wherever referenced, the three-digit and single digit forms can be used interchangeably. For the purposes of part-marking of components produced in accordance with this standard, the three-digit form should be used.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the EN title page, pages 2 and 3 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

This British Standard, having been prepared under the direction of the Engineering Sector Board, was published under the authority of the Standards Board and comes into effect on 15 November 1997
