

Common test methods for cables under fire conditions — Tests on gases evolved during combustion of materials from cables —

Part 2-1: Procedures — Determination of the amount of halogen acid gas

The European Standard EN 50267-2-1:1998 has the status of a
British Standard

ICS 13.220.40; 29.060.20

National foreword

This British Standard is the English language version of EN 50267-2-1:1998. When combined with BS EN 50267-1, it supersedes BS 6425-1:1990 which is withdrawn.

The UK participation in its preparation was entrusted by Technical Committee GEL/20, Electric cables, to Subcommittee GEL/20/3, Insulation and sheath, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled "International Standards Correspondence Index", or by using the "Find" facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, the EN title page, pages 2 to 5 and a back cover.

English version

**Common test methods for cables under fire conditions —
Tests on gases evolved during combustion of materials from cables —
Part 2-1: Procedures — Determination of the amount of halogen acid gas**

Méthodes d'essai communes aux câbles soumis au feu — Essais sur les gaz émis lors de la combustion d'un matériau prélevé sur un câble —
Partie 2-1: Procédures — Détermination de la quantité de gaz acides halogénés

Allgemeine Prüfverfahren für das Verhalten von Kabeln und isolierten Leitungen im Brandfall — Prüfung der bei der Verbrennung der Werkstoffe von Kabeln und isolierten Leitungen entstehenden Gase —
Teil 2-1: Prüfverfahren — Bestimmung des Gehaltes an Halogenwasserstoffsäure

This European Standard was approved by CENELEC on 1998-04-01. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the Central Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.
