

BSI Standards Publication

**Stationary source emissions
— Determination of PM₁₀/
PM_{2,5} mass concentration in
flue gas — Measurement at
higher concentrations by use of
virtual impactors**

National foreword

This British Standard is the UK implementation of ISO 13271:2012.

The UK participation in its preparation was entrusted to Technical Committee EH/2/1, Stationary source emission.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
