

# Methods of test for petroleum and its products —

**Part 121: Determination of oil  
separation from lubricating grease —  
Pressure filtration method  
(Identical with IP 121:2011)**

ICS 75.100

# Foreword

## Publishing information

This part of BS 2000 is published by BSI Standards Limited, under licence from The British Standards Institution, and came into effect on 18 November 2005. It was prepared by Technical Committee PTI/13, *Petroleum Testing and Terminology*. A list of organizations represented on this committee can be obtained on request to its secretary.

## Supersession

This part of BS 2000 supersedes BS 2000-121:2005, which is withdrawn.

## Information about this document

This amendment updates this standard to be in line with changes implemented by the Energy Institute.

BS 2000 comprises a series of test methods for petroleum and its products that are published by the Institute of Petroleum (IP) and have been accorded the status of a British Standard. Each method should be read in conjunction with the preliminary pages of “Standard Methods for Analysis and Testing of Petroleum Products and British Standard 2000 Parts” which gives details of the BSI/IP agreement for publication of the series, provides general information on safety precautions, sampling and other matters, and lists the methods published as parts of BS 2000.

Under the terms of the agreement between BSI and the Institute of Petroleum, the amendment to BS 2000-121 will be published by BSI and by the IP (in “Standard Methods for Analysis and Testing of Petroleum Products and British Standard 2000 Parts” and as a separated publication).

The numbering of the parts of BS 2000 follows that of the corresponding IP methods.

BS 2000-121:2005+A1:2014 is thus identical with IP 121:2011.

**WARNING.** This part of BS 2000 calls for the use of substances and/or procedures that can be injurious to health if adequate precautions are not taken. It refers only to technical suitability and does not absolve the user from legal obligations relating to health and safety at any stage.

It has been assumed in the preparation of this part of BS 2000 that the execution of its provisions will be entrusted to appropriately qualified and experienced people, for whose use it has been produced.

## Presentational conventions

The provisions of this standard are presented in roman (i.e. upright) type. Its methods are expressed as a set of instructions, a description, or in sentences in which the principal auxiliary verb is “shall”.

## Contractual and legal considerations

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

**Compliance with a British Standard cannot confer immunity from legal obligations.**

This British Standard was published under the authority of the Standards Policy and Strategy Committee on 18 November 2005
