

BS 5970:2012

BSI Standards Publication

**Thermal insulation of
pipework, ductwork,
associated equipment and
other industrial installations
in the temperature range of
–100 °C to +870 °C – Code of
practice**

Contents

Foreword *iv*

Section 1: General 1

- 1 Scope 1
- 2 Normative references 1
- 3 Terms and definitions 3

Section 2: Design and materials 5

- 4 Design considerations 5
- 5 Exchange of design data 11
- 6 Factors affecting planning and programming 13
- 7 Typical characteristics of insulating materials and insulation systems 14
- 8 Corrosion 27
- 9 Selection of thermal insulating materials 33
- 10 Selection of securing materials 39
- 11 Selection of vapour barriers 53
- 12 Selection of finishing materials, including ultimate treatment of finish 62
- 13 Selection of thermal insulation systems 67

Section 3: Site considerations 71

- 14 Basis and method of presenting schedule of work for agreement between purchaser and contractor 71
- 15 Packaging and transport to site 72
- 16 Labour and supervision 72
- 17 Provision of storage space, protection and safety during storage 73
- 18 Provision of power, water, light, heat and accommodation for personnel 73
- 19 Provision of access equipment 74
- 20 Responsibility for studs, cleats, etc. 74
- 21 Observance of site safety and security regulations 74
- 22 Protection of adjacent equipment and surfaces 74
- 23 Clearing waste material from site 74
- 24 Health considerations 75

Section 4: Application methods 76

- 25 Methods of application and practical consideration 76
- 26 Surface preparation and accessories 76
- 27 Securements 77
- 28 Cold insulation – Application for systems operating in the temperature range $-100\text{ }^{\circ}\text{C}$ to ambient temperature 87
- 29 Hot insulation – Application for systems operating in the temperature range above ambient to $+870\text{ }^{\circ}\text{C}$ 102
- 30 Indoor finishes and their methods of application 125
- 31 Weather-resistant finishes 132
- 32 Ultimate treatment of finish painting 134
- 33 Inspection and testing of the insulated system materials before and during installation 135

Section 5: Post-installation inspection and maintenance 136

- 34 Maintenance 136
- 35 Guarantees 138

Annexes

- Annex A (informative) Adhesives 139
- Annex B (informative) Water vapour pressure and the relation to water vapour barriers 143
- Annex C (informative) Water vapour diffusion resistance ratio (μ value) 145
- Annex D (informative) Examples of termination methods 146

Bibliography 148
