

Specification for

Modular coordination in building

UDC 721.013 + 69.032

Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Basic Data and Performance Criteria for Civil Engineering and Building Structures Standards Committee (BDB/-) to Technical Committee BDB/4, upon which the following bodies were represented:

Association of County Councils
 Association of Metropolitan Authorities
 Brick Development Association
 British Standards Society
 Building Employers Confederation
 Chartered Institution of Building Services Engineers
 Concrete Society
 Department of Education and Science
 Department of the Environment (Building Research Establishment)
 Department of the Environment (Property Services Agency)
 Incorporated Association of Architects and Surveyors
 Institute of Building Control Officers
 Institute of Clerks of Works of Great Britain Inc.
 Institution of Civil Engineers
 Institution of Public Health Engineers
 Institution of Structural Engineers
 National Council of Building Materials Producers
 Royal Institute of British Architects
 Royal Institution of Chartered Surveyors

This British Standard, having been prepared under the direction of the Basic Data and Performance Criteria for Civil Engineering and Building Structures Standards Committee, was published under the authority of the Board of BSI and comes into effect on 29 August 1986

© BSI 07-1999

Foreword	iii
<hr/>	
0 Introduction	1
1 Scope	1
2 Definitions	1
3 Basic module	2
4 Multimodules	2
5 Submodular increments	2
6 Modular sizes for coordinating dimensions of spaces	2
7 Modular reference system	2
8 Modular grids	3
9 Key reference planes	3
10 Modular floor plane	3
11 Storey heights and room heights	5
<hr/>	
Appendix A Guidance	7
<hr/>	
Index	20
<hr/>	
Figure 1 — Basic module spacegrid	4
Figure 2 — Examples of modular grids for specific purposes directly related to the basic module grid	4
Figure 3 — Positions for the modular floor plane	4
Figure 4 — Position for the modular floor plane	5
Figure 5 — Positions of the structure in relation to the modular storey height and floor plane	6
Figure 6 — Face and axial disciplines	7
Figure 7 — Plans of external wall with 1 M columns	8
Figure 8 — Plans of external wall with 2 M columns	9
Figure 9 — Plan of external wall with 3 M columns	9
Figure 10 — Plans of external walls with non-modular columns: effect on other components	10
Figure 11 — Examples of finished faces of partitions defined by modular planes	10
Figure 12 — Example of finished faces of partition not coinciding with modular planes	11
Figure 13 — Assembly of modular fitment in non-modular space	11
Figure 14 — Non-modular zone	12
Figure 15 — Key reference planes for floors, ceilings and roofs	12
Figure 16 — Key dimensions at changes of level	12
Figure 17 — Positions for the modular floor plane	12
Figure 18 — Positions of the structure in relation to the modular storey height and floor plane	13
Figure 19 — Use of 75 mm brickwork courses with 100 mm reference system	14
Figure 20 — Modular size = work size + joint	15
Figure 21 — Plan of a building showing a use of multimodules to relate structure and cladding	16
Figure 22 — Combination of 3 M and 4 M components to fill every modular space from 6 M upwards	17
Figure 23 — Relationship of joint reference planes to modular reference planes	17
