Flat-bottomed, vertical, cylindrical storage tanks for low temperature service —

Part 3: Recommendations for the design and construction of prestressed and reinforced concrete tanks and tank foundations, and for the design and installation of tank insulation, tank liners and tank coatings

Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Pressure Vessel Standards Policy Committee (PVE/-) to Technical Committee PVE/15, upon which the following bodies were represented:

British Chemical Engineering Contractors' Association

British Compressed Gases Association

British Gas plc

Concrete Society

Energy Industries Council

Engineering Equipment and Materials Users' Association

Institution of Gas Engineers

Institution of Mechanical Engineers

Process Plant Association

Thermal Insulations Contractors' Association

Welding Institute

This British Standard, having been prepared under the direction of the Pressure Vessel Standards Policy Committee, was published under the authority of the Standards Board and comes into effect on 15 June 1993

 $\ensuremath{\mathbb{C}}$ BSI 02-1999
