BSI Standards Publication

Information technology — Security techniques — Information security management guidelines based on ISO/IEC 27002 for process control systems specific to the energy utility industry

bsi.

...making excellence a habit.™

National foreword

This Published Document is the UK implementation of ISO/IEC TR 27019:2013.

As described in its International Foreword, ISO/IEC TR 27019:2013 was adopted by Joint Technical Committee ISO/IEC JTC 1, Information technology, using the "fast track procedure". In consequence it has been published as an ISO/IEC Technical Report, and adopted by BSI as a Published Document.

However, IST/33 considers its content to be analogous to other sector-specific interpretations of ISO/IEC 27002, *Code of practice for information security management*, that have been published as International and British Standards.

The content of this Published Document is based on the 2005 edition of ISO/IEC 27002 and may need to be updated when ISO/IEC 27002 is republished.

The UK participation in its preparation was entrusted to Technical Committee IST/33, IT – Security techniques.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
