Ferrotitanium — Specification and conditions of delivery

Ferro-titane — Spécifications et conditions de livraison

First edition — 1980-12-01

UDC 669.15'295-198

Ref. No. ISO 5454-1980 (E)

Descriptors : ferroalloys, ferrotitanium, specifications, delivery conditions, chemical composition.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 5454 was developed by Technical Committee ISO/TC 132, *Ferrous alloys*, and was circulated to the member bodies in November 1979.

It has been approved by the member bodies of the following countries :

Australia	India	South Africa, Rep. of
Austria	Italy	Sweden
Brazil	Japan	United Kingdom
Canada	Norway	USA
Czechoslovakia	Poland	USSR
France	Portugal	Yugoslavia
Germany, F.R.	Romania	

No member body expressed disapproval of the document.
