Ref. No. ISO 5975-1983 (E)

## **Foreword**

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 5975 was developed by Technical Committee ISO/TC 65, *Manganese and chromium ores*, and was circulated to the member bodies in April 1982.

It has been approved by the member bodies of the following countries:

Austria India
Brazil Italy
China Japan
Czechoslovakia Poland

Poland Romania

Egypt, Arab Rep. of Romania France South Africa, Rep. of Spain Thailand

United Kingdom USSR

.

The member body of the following country expressed disapproval of the document on technical grounds:

Australia
