Ref. No. ISO 6466-1983 (E)

Descriptors : tobacco, chemical analysis, determination of content, residues, pesticides.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 6466 was developed by Technical Committee ISO/TC 126, *Tobacco and tobacco products*, and was circulated to the member bodies in March 1982.

It has been approved by the member bodies of the following countries :

Austria	Greece	Sweden
Belgium	India	Switzerland
Brazil	Iraq	Tanzania
Cuba	Italy	Thailand
Czechoslovakia	Malaysia	Turkey
Egypt, Arab Rep. of	Netherlands	United Kingdom
France	Portugal	USSR
Germany, F.R.	South Africa, Rep. of	

No member body expressed disapproval of the document.
