Ref. No. ISO 7901-1984 (E)

Descriptors : data processing, flexible disks, characteristics.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 7901 was developed by Technical Committee ISO/TC 97, *Information processing systems*, and was circulated to the member bodies in March 1983.

It has been approved by the member bodies of the following countries :

Australia	Hungary	Romania
Austria	Ireland	Spain
Belgium	Japan	Sweden
Canada	Mexico	Switzerland
Czechoslovakia	Netherlands	United Kingdom
France	New Zealand	USA
Germany, F. R.	Poland	USSR

No member body expressed disapproval of the document.
