**Information technology —  
Telecommunications and information  
exchange between systems — Transport  
conformance testing for connection-mode  
transport protocol operating over  
connection-mode network service —**

**Part 3:**

Transport test management protocol  
specification

*Technologies de l'information — Télécommunications et échange  
d'information entre systèmes — Essais de conformité de la couche  
transport pour le protocole de transport en mode connexion opérant sur  
le service réseau en mode connexion —*

*Partie 3: Spécifications du protocole de gestion de test de transport*

## Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.

International Standard ISO/IEC 10025-3 was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Sub-Committee SC 6, *Telecommunications and information exchange between systems*.

ISO/IEC 10025 consists of the following parts, under the general title *Information technology — Telecommunications and information exchange between systems — Transport conformance testing for connection-mode transport protocol operating over connection-mode network service*:

- *Part 1: General principles*
- *Part 2: Test suite structure and test purposes*
- *Part 3: Transport test management protocol specification*
- *Part 4: Abstract test suites and PIXIT*

Annexes A and B form an integral part of this part of ISO/IEC 10025. Annexes C and D are for information only.
