

INTERNATIONAL
STANDARD

ISO/IEC
10040

Second edition
1998-10-15

Information technology — Open Systems Interconnection — Systems management overview

*Technologies de l'information — Interconnexion de systèmes ouverts
(OSI) — Aperçu général de la gestion-système*

Reference number
ISO/IEC 10040:1998(E)

Contents

	<i>Page</i>
1 Scope	1
2 Normative references	1
2.1 Identical ITU-T Recommendations International Standards.....	1
2.2 Paired Recommendations International Standards equivalent in technical content	3
2.3 Additional references.....	4
3 Definitions	4
3.1 Basic reference model definitions	4
3.2 Management framework definitions	4
3.3 CMISE definitions.....	4
3.4 Management information model definitions	4
3.5 OSI conformance testing methodology and framework definitions.....	5
3.6 Systems management overview definitions	5
4 Abbreviations.....	6
5 Systems management.....	7
6 Systems management model	8
6.1 Introduction	8
6.2 Information aspects	9
6.3 Functional aspects	11
6.4 OSI communications aspects.....	11
6.5 Organizational aspects.....	15
7 Systems management standards	16
7.1 Architecture and structure	17
7.2 Communication of management information.....	17
7.3 Structure of management information	17
7.4 Systems management functions	18
8 Conformance and compliance.....	19
8.1 Compliance to this Recommendation International Standard	19
8.2 Conformance to this Recommendation International Standard.....	21
Annex A – Application context for systems management.....	22
A.1 Background	22
A.2 Systems management application context	22
A.3 Rules for establishing associations	23
A.4 Conformance	25
Annex B – Scope statement for systems management functions.....	26
B.1 The rules	26
B.2 The boilerplate.....	26

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.

International Standard ISO/IEC 10040 was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 33, *Distributed application services*, in collaboration with ITU-T. The identical text is published as ITU-T Recommendation X.701.

This second edition cancels and replaces the first edition (ISO/IEC 10040:1992), which has been technically revised. It also incorporates Amendment 1:1995, Technical Corrigendum 1:1994 and Technical Corrigendum 2:1996.

Annex A forms an integral part of this International Standard. Annex B is for information only.
