**Corrosion of metals and alloys —
Electrochemical measurement of ion
transfer resistance to characterize
the protective rust layer on
weathering steel**

*Corrosion des métaux et alliages — Mesurage électrochimique de la
résistance au transfert d'ions pour caractériser la couche de rouille
protectrice sur l'acier autopatinable*

Contents

	Page
Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Corrosion resistance by weathering steel	2
4.1 Formation of rust	2
4.2 Typical types of rust by cross-sectional view	3
5 Measurement of ion transfer resistance	4
5.1 General	4
5.2 Electrochemical impedance and harmonic current measurements	4
6 Measurements in the field	6
7 Evaluation of the corrosion protective property of the rust layer	8
8 Practical method of measurement for ion transfer resistance and thickness	9
9 Test report	10
10 Application of the method of measurement	11
Annex A (informative) Example of a frequency range suitable for measuring the ion transfer resistance	12
Bibliography	13
