**Energy performance of buildings —  
Thermal, solar and daylight properties  
of building components and  
elements —**

Part 2:  
**Explanation and justification**

*Performance énergétique des bâtiments — Propriétés thermiques,  
solaires et lumineuses des composants et éléments du bâtiment —  
Partie 2: Explication et justification*

Foreword.....	v
Introduction.....	vi
<b>1 Scope.....</b>	<b>1</b>
<b>2 Normative references.....</b>	<b>1</b>
<b>3 Terms and definitions.....</b>	<b>1</b>
<b>4 Symbols and subscripts.....</b>	<b>2</b>
<b>5 Brief description of the methods.....</b>	<b>2</b>
5.1 Outputs of the method.....	2
5.2 General description of the methods.....	2
<b>6 ISO 10077-1 Thermal performance of windows, doors and shutters – Calculation of thermal transmittance – Part 1: General.....</b>	<b>2</b>
6.1 General.....	2
6.2 Thermal transmittance of the glazing.....	3
6.3 Additional thermal resistance of windows with closed shutters.....	3
<b>7 ISO 10077-2 Thermal performance of windows, doors and shutters – Calculation of thermal transmittance – Part 2: Numerical method for frames.....</b>	<b>3</b>
7.1 General.....	3
7.2 Calculation principle.....	3
<b>8 ISO 12631 Thermal performance of curtain walling – Calculation of thermal transmittance.....</b>	<b>4</b>
8.1 General.....	4
8.2 Calculation examples.....	4
<b>9 ISO 52022-1 Energy performance of buildings — Thermal, solar and daylight properties of building components and elements — Part 1: Simplified calculation method of the solar and daylight characteristics for solar protection devices combined with glazing.....</b>	<b>4</b>
9.1 General.....	4
9.2 Data for typical glazing and solar protection devices.....	5
9.3 Solar transmittance of solar protection devices.....	5
9.4 Calculation example.....	5
<b>10 ISO 52022-3 Energy performance of buildings — Thermal, solar and daylight properties of building components and elements — Part 3: Detailed calculation method of the solar and daylight characteristics for solar protection devices combined with glazing.....</b>	<b>6</b>
10.1 General.....	6
10.2 Equivalent solar and light optical characteristics for louvres or venetian blinds.....	6
10.3 Calculation example.....	6
<b>Annex A (informative) ISO 10077-1: Thermal transmittance of double and triple glazing.....</b>	<b>7</b>
<b>Annex B (informative) ISO 10077-1: Additional thermal resistance for windows with closed shutters.....</b>	<b>9</b>
<b>Annex C (informative) ISO 12631: Component method: Calculation example.....</b>	<b>12</b>
<b>Annex D (informative) ISO 12631: Single assessment method: Calculation example.....</b>	<b>17</b>
<b>Annex E (informative) ISO 52022-1: Data for typical glazing and solar protection devices.....</b>	<b>20</b>
<b>Annex F (informative) ISO 52022-1: Example of calculation of a solar protection device in combination with glazing.....</b>	<b>21</b>
<b>Annex G (informative) Extended methodology for the determination of equivalent solar and light optical characteristics for louvres or venetian blinds.....</b>	<b>23</b>
