

WELDING RESEARCH COUNCIL BULLETIN

Fracture Development and Material Properties
in PVRC-Penn State Pressure Vessel

L. A. Cooley and E. A. Lange

Fatigue-Crack Propagation and Fracture Studies of
a Pressure-Vessel Steel Temper Embrittled to
Simulate Radiation Damage

T. W. Crooker, L. A. Cooley and E. A. Lange

These Bulletins contain final Reports from projects sponsored
by the Welding Research Council, important papers presented before
engineering societies and other reports of current interest
which are not published in WELDING RESEARCH.

Bulletin No. 126 . . . \$1.00 per copy

INTENTIONALLY LEFT BLANK

WRC - The Welding Research Council brings together science and engineering specialists in developing the solutions to problems in welding and pressure vessel technology. They exchange knowledge, share perspectives, and execute R and D activities. As needed, the Council organizes and manages cooperative programs.

MPC – A Council of the WRC, the Materials Properties Council is dedicated to providing industry with the best technology and the best data that can be obtained on the properties of materials to help meet today's most advanced concepts in design and service, life assessment, fitness-for-service, and reliability and safety.

PVRC – A Council of the WRC, the goal of the Pressure Vessel Research Council is to encourage, promote and conduct research in the field of pressure vessels and related pressure equipment technologies, including evaluation of materials, design, fabrication, inspection and testing.
