

IAPMO IGC 91-2019

**Electrical or High
Density Magnetic Anti-
Scale or Water
Conditioning Appliance**

IAPMO Standard

Approval of an IAPMO Industry Standard requires verification by the Standards Review Committee that the standard has been developed in accordance with the policies and procedures for standards development (S-001, *Standards Development Process*, S-008, *Appeals* and S-011, *Operation of the IAPMO Standards Review Committee*). Although IAPMO administers the process and establishes rules to promote fairness in achieving consensus, it does not independently test, evaluate, or verify the content of standards.

Consensus is established when substantial agreement has been reached by directly and materially affected interests. Substantial agreement means much more than a simple majority, but not necessarily unanimity. Consensus requires that all views and objections be considered, and that a concerted effort be made toward their resolution.

The use of IAPMO Industry Standards is completely voluntary; their existence does not in any respect preclude anyone, whether they have approved the standards or not, from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standards.

The Standards Review Committee has final authority on interpretation of any IAPMO Industry Standard. Moreover, no person save IAPMO designated staff shall have the right or authority to issue an interpretation of an IAPMO Industry Standard in the name of IAPMO. Requests for interpretations should be addressed to the secretariat or sponsor whose name appears on the title page of this standard.

CAUTION NOTICE: This IAPMO Industry Standard may be revised or withdrawn at any time. The policies and procedures require that action be taken periodically to reaffirm, revise, or withdraw this standard. Interested stakeholders of IAPMO Industry Standards may receive current information on all standards by [signing up to receive updates and notices](#) at the IAPMO Standards website www.IAPMOstandards.org.

Contents

Preface

IAPMO Standards Review Committee

1 Scope

- 1.1 Scope
- 1.2 Alternative Materials
- 1.3 Terminology
- 1.4 Units of Measurement

2 Reference Publications

3 Definitions and Abbreviations

- 3.1 Definitions
- 3.2 Abbreviations

4 General Requirements

- 4.1 Materials
- 4.2 Connections
- 4.3 Electrical Requirements
- 4.4 Capacitor Units
- 4.5 Toxicity
- 4.6 Flow Switch
- 4.7 Wrap Around Type High-Density Magnetic Units
- 4.8 Water Flowing Type High-Density Magnetic Units
- 4.9 Flanged Connections

5 Testing Requirements

- 5.1 Leakage Test
- 5.2 Voltage Test
- 5.3 Pressure Loss Test
- 5.4 ORP Test
- 5.5 Recirculation Test
- 5.6 Electrostatic Field Strength Test
- 5.7 High-Density Magnetic Flux Test

6 Markings and Accompanying Literature

- 6.1 Markings
- 6.2 Labeling
