

Medical Gas and Vacuum Systems Handbook

THIRD EDITION

Edited by

Jonathan R. Hart, P.E.

Principal Fire Protection Engineer
National Fire Protection Association

With extracts from Chapters 1 through 5, Chapter 15, and Annexes A and B of the 2018 edition of NFPA® 99,
Health Care Facilities Code

NATIONAL FIRE PROTECTION ASSOCIATION

The leading information and knowledge resource on fire, electrical and related hazards

Product Management: Debra Rose
Development and Production: Irene Herlihy
Copyediting: Barbara Ingalls
Permissions: Josiane Domenici

Art Direction and Interior Design: Cheryl Langway
Cover Design: Twist Creative Group
Composition: Cenveo Publisher Services
Printing/Binding: Webcrafters, Inc.

Important Notices and Disclaimers: Publication of this handbook is for the purpose of circulating information and opinion among those concerned for fire and electrical safety and related subjects. While every effort has been made to achieve a work of high quality, neither the NFPA® nor the contributors to this handbook guarantee or warrant the accuracy or completeness of or assume any liability in connection with the information and opinions contained in this handbook. The NFPA and the contributors shall in no event be liable for any personal injury, property, or other damages of any nature whatsoever, whether special, indirect, consequential, or compensatory, directly or indirectly resulting from the publication, use of, or reliance upon this handbook.

This handbook is published with the understanding that the NFPA and the contributors to this handbook are supplying information and opinion but are not attempting to render engineering or other professional services. If such services are required, the assistance of an appropriate professional should be sought.

This handbook contains extracted portions of the 2018 edition of NFPA 99, *Health Care Facilities Code* (“NFPA 99”). These extracts are assembled here along with the other information in this handbook to provide a convenient reference on medical gas and vacuum systems. These extracts, however, are not intended to be a substitute for the full text of NFPA 99, which should always be consulted to ensure full code compliance.

NFPA 99, *Health Care Facilities Code*, (“NFPA 99”) is, like all NFPA codes, standards, recommended practices, and guides (“NFPA Standards”), made available for use subject to Important Notices and Legal Disclaimers, which appear at the end of this handbook and can also be viewed at www.nfpa.org/disclaimers.

Notice Concerning Code Interpretations: This third edition of the *Medical Gas and Vacuum Systems Handbook* contains extracted portions of the 2018 edition of NFPA 99. All NFPA codes, standards, recommended practices, and guides (“NFPA Standards”) are developed in accordance with the published procedures of the NFPA by technical committees comprised of volunteers drawn from a broad array of relevant interests. The handbook contains the complete text of NFPA 99 and any applicable Formal Interpretations issued by the NFPA at the time of publication. This NFPA Standard is accompanied by explanatory commentary and other supplementary materials.

The commentary and supplementary materials in this handbook are not a part of the NFPA Standard and do not constitute Formal Interpretations of the NFPA (which can be obtained only through requests processed by the responsible technical committees in accordance with the published procedures of the NFPA). The commentary and supplementary materials, therefore, solely reflect the personal opinions of the editor or other contributors and do not necessarily represent the official position of the NFPA or its technical committees.

REMINDER: UPDATING OF NFPA STANDARDS

NFPA 99, *Health Care Facilities Code*, like all NFPA codes, standards, recommended practices, and guides (“NFPA Standards”), may be amended from time to time through the issuance of Tentative Interim Amendments or corrected by Errata. An official NFPA Standard at any point in time consists of the current edition of the document together with any Tentative Interim Amendment and any Errata then in effect. In order to determine whether an NFPA Standard has been amended through the issuance of Tentative Interim Amendments or corrected by Errata, visit the “Codes & Standards” section on NFPA’s website. There, the document information pages located at the “List of NFPA Codes & Standards” provide up-to-date, document-specific information, including any issued Tentative Interim Amendments and Errata. To view the document information page for a specific NFPA Standard, go to <http://www.nfpa.org/docinfo> to choose from the list of NFPA Standards, or use the search feature to select the NFPA Standard number (e.g., NFPA 99). The document information page includes postings of all existing Tentative Interim Amendments and Errata. It also includes the option to register for an “Alert” feature to receive an automatic email notification when new updates and other information are posted regarding the document.

NFPA 99 Summary of Technical Changes: 2015 to 2018	T-1

PART 1

Medical Gas and Vacuum Systems Handbook 1

1 Administration	3
1.1 Scope	3
1.2 Purpose	6
1.3 Application	6
1.4 Equivalency	9
1.5 Units	10
1.6 Code Adoption Requirements	10
2 Referenced Publications	13
2.1 General	13
2.2 NFPA Publications	14
2.3 Other Publications	15
2.4 References for Extracts in Mandatory Sections	19
3 Definitions	21
3.1 General	21
3.2 NFPA Official Definitions	21
3.3 General Definitions	23
4 Fundamentals	55
4.1 Risk Categories	55
4.2 Risk Assessment	58
4.3 Application	60
4.4 Materials	60

5 Gas and Vacuum Systems 63

5.1 Category 1 Piped Gas and Vacuum Systems	65
5.2 Category 2 Piped Gas and Vacuum Systems	276
5.3 Category 3 Piped Gas and Vacuum Systems	280

15 Dental Gas and Vacuum Systems 289

15.1 Applicability	289
15.2 Nature of Hazards of Gas and Vacuum Systems	290
15.3 Category 1 Dental Gas and Vacuum Systems	291
15.4 Category 2 Dental Gas and Vacuum Systems	300
15.5 Category 3 Dental Gas and Vacuum Systems	334

Annexes

A Explanatory Material	343
B Additional Explanatory Notes	345

PART 2

Supplements 351

1 Qualifications for Personnel Performing Medical Gas Work and General Brazing Procedures	353
2 Cleaning for Oxygen Service and Preparing a Joint for Brazing	357
3 Installation Testing and Documentation	359

Index 373

Important Notices and Disclaimers 383
