Type F-1 Fiber Optic Media Interface Characteristics

RATIONALE

This document has been determined to contain basic and stable technology which is not dynamic in nature.

STABILIZED NOTICE

This document has been declared "Stabilized" by the SAE AS-1A Avionic Networks Committee and will no longer be subjected to periodic reviews for currency. Users are responsible for verifying references and continued suitability of technical requirements. Newer technology may exist.

1. SCOPE:

This slash sheet specifies the operational parameters and characteristics of a particular implementation of the SAE Linear, Token Passing Bus (LTPB) Interface Unit.

This slash sheet defines the following:

a. The physical media interface: This slash sheet specifies the characteristics of the optical interface to the physical bus media.

b. The minimum and maximum timing requirements for operation of this implementation of the LTPB.

c. The data coding used to encode and decode the data for transmission.

d. The default values to be loaded into the timers of the LTPB interface at power-up prior to intervention by the host processor.

2. REFERENCES:

There are no referenced publications specified herein.
