INTERNATIONAL STANDARD

First edition 1991-10-15 AMENDMENT 1 1994-12-15

Information technology — Programming languages — Full BASIC

AMENDMENT 1: Modules and single character input enhancement

Technologies de l'information — Langages de programmation — Full BASIC

AMENDEMENT 1: Mise en valeur d'entrée de modules et de caractère unique

Amendment 1:1996 to National Standard of Canada CAN/CSA-ISO/IEC-10279-94

Amendment 1: 1994 to International Standard **ISO/IEC 10279:1991** has been adopted, without modification, as Amendment 1:1996 to **CAN/CSA-ISO/IEC-10279-94.**

November 1996

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.

Amendment 1 to International Standard ISO/IEC 10279:1991 was prepared by Joint Technical Committee ISO/IEC JTC 1, Information technology, Subcommittee 22, Programming languages, their environments and system software interfaces.

Annex A of this amendment is for information only.

Introduction

This amendment is designed to promote the interchangeability of BASIC programs among a variety of automatic data processing systems that utilize the individual character input and module features. It is an enhancement to ISO/IEC 10279 and shall be used in conjunction with ISO/IEC 10279. This amendment is derived from the American National Standard X3.113A-1989.
