---

## **Process Characterization Guideline**

---

### **JEP132A**

(Revision of JEP132, July 1998: Reaffirmed September 2003, January 2007)

---

**AUGUST 2018**

---

**JEDEC SOLID STATE TECHNOLOGY ASSOCIATION**

## NOTICE

JEDEC standards and publications contain material that has been prepared, reviewed, and approved through the JEDEC Board of Directors level and subsequently reviewed and approved by the JEDEC legal counsel.

JEDEC standards and publications are designed to serve the public interest through eliminating misunderstandings between manufacturers and purchasers, facilitating interchangeability and improvement of products, and assisting the purchaser in selecting and obtaining with minimum delay the proper product for use by those other than JEDEC members, whether the standard is to be used either domestically or internationally.

JEDEC standards and publications are adopted without regard to whether or not their adoption may involve patents or articles, materials, or processes. By such action JEDEC does not assume any liability to any patent owner, nor does it assume any obligation whatever to parties adopting the JEDEC standards or publications.

The information included in JEDEC standards and publications represents a sound approach to product specification and application, principally from the solid state device manufacturer viewpoint. Within the JEDEC organization there are procedures whereby a JEDEC standard or publication may be further processed and ultimately become an ANSI standard.

No claims to be in conformance with this standard may be made unless all requirements stated in the standard are met.

Inquiries, comments, and suggestions relative to the content of this JEDEC standard or publication should be addressed to JEDEC at the address below, or refer to [www.jedec.org](http://www.jedec.org) under Standards and Documents for alternative contact information.

## PROCESS CHARACTERIZATION GUIDELINE

### Contents

	<u>Page</u>
Introduction	iii
1 Scope	1
2 Terms and definitions	1
3 References	1
3.1 Government Documents	1
3.2 Industry Standards	1
3.3 Examples of Process Characterization Related Documents	1
4 General requirements	2
4.1 Description of Process Characterization Flow	2
4.1.1 Identify process	2
4.1.2 Define process	2
4.1.3 Determine characteristics and measurables	2
4.1.4 Perform gauge studies	2
4.1.5 Collect data	2
4.1.6 Characterize process repeatability	3
4.1.7 Does process meet requirements	3
4.1.8 Perform capability study	3
4.1.9 Is process acceptable	3
4.1.10 Process improvement	3
4.1.11 Is process in control	3
4.1.12 Corrective action to remove special causes	3
4.1.13 Maintenance	4
4.2 Tools	4
4.2.1 Capability analysis	4
4.2.1.1 Examples of capability analysis	4
4.2.2 Cost models	5
4.2.3 Data collection	5
4.2.4 DOE	5
4.2.5 Expert systems	6
4.2.5.1 Example of expert systems	6
4.2.6 Finite element modeling and analysis	6
4.2.7 Flow charting/process mapping	6
4.2.7.1 Examples of flow charting/process mapping	6
4.2.8 FMEA	7
4.2.8.1 Examples of FMEA	7
4.2.9 Modeling	7
4.2.10 Measurement system evaluation/analysis (MSE/MSA, including gauge studies)	7
4.2.10.1 Example of MSE/MSA	7
4.2.11 Problem solving	8
4.2.11.1 Problem solving tools	8
4.2.11.1.1 Bar chart	8
4.2.11.1.2 Control chart	8
4.2.11.1.3 Fishbone (Cause-and-effect) diagram	8
4.2.11.1.4 Histogram	8
4.2.11.1.5 Pareto chart	8
4.2.11.1.6 Scatter plots	8
