

Railway applications — Structural requirements of railway vehicle bodies

Part 2: Freight wagons

ICS 45.060.20

National foreword

This British Standard is the UK implementation of EN 12663-2:2010. Together with BS EN 12663-1:2010, it supersedes BS EN 12663:2000 which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee RAE/1/-/2, Railway Applications - Structural requirements and Welding.

A list of organizations represented on this committee can be obtained on request to its secretary.

"Normative" - A (mandatory) requirement defined as an "expression in the content of a document conveying criteria to be fulfilled if compliance with the document is to be claimed and from which no deviation is permitted" [CEN/CENELEC Internal Regulations, Part 3: Rules for the Structure and Drafting of European Standards (PNE-Rules)].

"Informative" - Information (not mandatory) intended to assist the understanding or use of the document. Informative annexes shall not contain requirements, except as optional requirements. (For example, a test method that is optional may contain requirements but there is no need to comply with these requirements to claim compliance with the document.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard cannot confer immunity from legal obligations.
