National foreword

This British Standard has been prepared under the direction of the BSI Standards Board and is the English language version of EN ISO 3947 : 1994 *Starches, native or modified — Determination of total fat content*, published by the European Committee for Standardization (CEN). It is identical with ISO 3947 : 1977 *Starches, native or modified — Determination of total fat content*, published by the International Organization for Standardization (ISO).

This British Standard has been produced to fulfil BSI's obligation to publish all approved European Standards but, because of the absence of interest in the UK in the subject concerned, there has been no UK participation in the preparation of EN ISO 3947.

Any queries relating to the EN should be directed to BSI.

Compliance with a British Standard does not of itself confer immunity from legal obligations.
