

Australian Standard[®]

Copper sulfide concentrates

Part 1: Determination of copper content—Titrimetric methods

[ISO title: Copper sulfide concentrates—Determination of copper
content—Titrimetric methods]

This Australian Standard was prepared by Committee MN/5, Copper, Lead, Zinc, Gold and Silver Ores and Concentrates. It was approved on behalf of the Council of Standards Australia on 2 September 1994 and published on 5 December 1994.

The following interests are represented on Committee MN/5:

Australasian Institute of Mining and Metallurgy
Australian Lead Development Association
Australian Mining Industry Council
CSIRO, Division of Mineral and Processing Engineering

Review of Australian Standards. *To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.*

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.
