## National foreword

This British Standard is the English language version of EN 10087:1998. It partially supersedes BS 970-1:1996 by replacing some of the requirements covered in Section 1. This standard should be used in preference to BS 970-1:1996 whenever possible until an amendment of BS 970-1:1996 has been carried out.

A review is being carried out by the Technical Committee with the aim of deciding the best way of carrying out appropriate amendments to BS 970-1:1996 due to the fact that it will be partially superseded by several individual European Standards over the next two years.

National annex NA describes steels used in the United Kingdom but not included in the European Standard.

The UK participation in its preparation was entrusted to Technical Committee ISE/31, Wrought steels, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

### Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled "International Standards Correspondence Index", or by using the "Find" facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

**Compliance with a British Standard does not of itself confer immunity from legal obligations.**

This British Standard, having been prepared under the direction of the Engineering Sector Committee, was published under the authority of the Standards Committee and comes into effect on 15 January 1999
