

DIN ISO 897

ICS 37.040.20

Supersedes February 1993
edition.

Photography
Roll films, 126, 110 and 135-size films
Identification of the image-bearing side
(ISO 897:2000)

Fotografie – Rollfilme; Filme Nr. 126, 110 und 135 – Identifizierung der Schichtseite (ISO 897:2000)

National foreword

This standard has been prepared by ISO/TC 42 'Photography'.

The responsible German body involved in its preparation was the *Normenausschuss Bild und Film* (Cinematography and Photography Standards Committee), Technical Committee NBF 1 *Strahlungsempfindliche Materialien, Sensitometrie und Formate*.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. DIN shall not be held responsible for identifying any or all such patent rights.

The DIN Standard corresponding to the International Standard referred to in clause 2 of the ISO Standard is as follows:

ISO 13450 DIN 4528-3

Amendments

This standard differs from the February 1993 edition as follows:

- a) The normative references have been updated.
- b) The standard has been editorially revised.

Previous editions

DIN 4510-4: 1970-01, 1981-02

DIN ISO 897: 1993-02

National Annex NA

(informative)

Bibliography

DIN 4528-3 110-size cartridge – Film and backing paper

Document comprises 5 pages.

Photography
Roll films, 126, 110 and 135-size films
Identification of the image-bearing side

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this International Standard may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

International Standard ISO 897 was prepared by Technical Committee ISO/TC 42, *Photography*.

This third edition cancels and replaces the second edition (ISO 897:1988), of which it constitutes a technical revision.
