

INTERNATIONAL
STANDARD

ISO
9920

First edition
1995-03-01

**Ergonomics of the thermal
environment — Estimation of the thermal
insulation and evaporative resistance of a
clothing ensemble**

*Ergonomie des ambiances thermiques — Détermination de l'isolement
thermique et de la résistance à l'évaporation d'une tenue vestimentaire*

Reference number
ISO 9920:1995(E)

Contents

	Page
1 Scope	1
2 Principles and general definitions	1
3 Estimation of the thermal insulation of a clothing ensemble based on tables with values measured on standing thermal manikin	2
4 Estimation of the clothing area factor	3
5 Influence of body movements and wind on the thermal insulation of a clothing ensemble	4
6 Estimation of the evaporative resistance	4

Annexes

A Thermal insulation values for clothing ensembles	5
B Thermal insulation values for individual garments	20
C Measurement of the thermal insulation of clothing on a thermal manikin	47
D Measurement of the thermal insulation and evaporative resistance of a clothing ensemble on human subjects	49
E Different expressions for the thermal insulation of clothing	50
F Evaporative resistance of a clothing ensemble	52

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 9920 was prepared by Technical Committee ISO/TC 159, *Ergonomics*, Subcommittee SC 5, *Ergonomics of the physical environment*.

Annexes A and B form an integral part of this International Standard. Annexes C, D, E and F are for information only.
