

INTERNATIONAL STANDARD

ISO 1461

Second edition
1999-02-01

Hot dip galvanized coatings on fabricated iron and steel articles — Specifications and test methods

*Revêtements par galvanisation à chaud sur produits finis ferreux —
Spécifications et méthodes d'essai*

Reference number
ISO 1461:1999(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 1461 was prepared by the European Committee for Standardization (CEN) in collaboration with ISO Technical Committee TC 107, *Metallic and other inorganic coatings*, Subcommittee SC 4, *Hot dip coatings (galvanized, etc.)*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

Throughout the text of this standard, read "...this European Standard..." to mean "...this International Standard...".

This second edition cancels and replaces the first edition (ISO 1461:1973) as well as the first edition of ISO 1459 (ISO 1459:1973), which has been technically revised.

Annexes A and B form an integral part of this International Standard. Annexes C to E are for information only.

For the purposes of this International Standard, the CEN annex regarding fulfilment of European Council Directives has been removed.
