Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 4469 was developed by Technical Committee ISO/TC 55, *Sawn timber and sawlogs*, and was circulated to the member bodies in May 1980.

It has been approved by the member bodies of the following countries :

Australia
Austria
Belgium
Brazil
Bulgaria
Czechoslovakia
Finland

France Germany, F.R. Ghana Hungary India Italy Norway

Poland Romania South Africa, Rep. of Sweden Turkey USSR Yugoslavia

The member bodies of the following countries expressed disapproval of the document on technical grounds :

Canada Ireland Netherlands
