**Iron ores — Static test for low-temperature  
reduction-disintegration —**

**Part 2:  
Reaction with CO**

*Minerais de fer — Essai statique de désagrégation par réduction à basse  
température —*

*Partie 2: Réaction avec CO*

## Contents

1 Scope .....	1
2 Normative references .....	1
3 Principle .....	1
4 Apparatus .....	2
5 Test conditions .....	4
5.1 Composition of reducing gas .....	4
5.2 Flow rate of reducing gas .....	4
5.3 Temperature of test .....	5
6 Sampling and sample preparation .....	5
7 Procedure .....	5
7.1 Number of determinations .....	5
7.2 Test portion .....	5
7.3 Reduction .....	5
7.4 Tumbling and sieving .....	6
8 Expression of results .....	6
9 Test report .....	6
10 Verification .....	7
Annex A (normative) Repeatability and number of tests .....	8

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 4696-2 was prepared by Technical Committee ISO/TC 102, *Iron ores*, Subcommittee SC 3, *Physical testing*.

Together with part 1, this part of ISO 4696 cancels and replaces ISO 4696:1984, which has been technically revised.

ISO 4696 consists of the following parts, under the general title *Iron ores — Static test for low-temperature reduction-disintegration*:

- *Part 1: Reaction with CO, CO<sub>2</sub> and H<sub>2</sub>*
- *Part 2: Reaction with CO*

Annex A forms an integral part of this part of ISO 4696.
