## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this part of ISO 1998 may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

International Standard ISO 1998-99 was prepared by Technical Committee ISO/TC 28, *Petroleum products and lubricants*, Subcommittee SC 1, *Terminology*.

This first edition of ISO 1998-99, together with ISO 1998-1:1998, ISO 1998-2:1998, ISO 1998-3:1998, ISO 1998-4:1998, ISO 1998-5:1998, ISO 1998-6:2000 and ISO 1998-7:1998, cancels and replaces ISO 1998-1:1974 and ISO 1998-2:1976.

Together, they constitute a full recast of the standard, with a new classification system for all terms of ISO 1998-1:1974 and ISO 1998-2:1976, which are now distributed in all parts of the new edition, and the addition of many new terms. ISO 1998-99 explains the classification system of terms and gives a general index.

ISO 1998 consists of the following parts, under the general title *Petroleum industry — Terminology*:

- *Part 1: Raw materials and products*
- *Part 2: Properties and tests*
- *Part 3: Exploration and production*
- *Part 4: Refining*
- *Part 5: Transport, storage, distribution*
- *Part 6: Measurement*
- *Part 7: Miscellaneous terms*
- *Part 99: General and index*
