Ref. No. ISO 3427-1976 (E)

Descriptors: halohydrocarbons, liquefied gases, tests, sampling, test specimen conditioning.

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 3427 was drawn up by Technical Committee ISO/TC 47, Chemistry, and circulated to the Member Bodies in February 1974.

It has been approved by the Member Bodies of the following countries:

Austria Hungary **Belgium** India **Bulgaria** Ireland Chile Israel Czechoslovakia Italy Egypt, Arab Rep. of Netherlands France New Zealand Germany Portugal

Romania South Africa, Rep. of

Spain Switzerland Thailand Turkey United Kingdom

U.S.S.R.

tugal U.S.S.

No Member Body expressed disapproval of the document.
