Ref. No. ISO 903-1976 (E)

Descriptors : aluminium oxide, tests, density measurement, bulk density.

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

Prior to 1972, the results of the work of the Technical Committees were published as ISO Recommendations; these documents are now in the process of being transformed into International Standards. As part of this process, Technical Committee ISO/TC 47 has reviewed ISO Recommendation R 903 and found it technically suitable for transformation. International Standard ISO 903 therefore replaces ISO Recommendation R 903-1968 to which it is technically identical.

ISO Recommendation R 903 was approved by the Member Bodies of the following countries :

Austria	Ireland	Spain
Belgium	Israel	South Africa, Rep. of
Bulgaria	Italy	Sweden
Canada	Japan	Switzerland
Czechoslovakia	Korea, Rep. of	Thailand
Egypt, Arab Rep. of	Netherlands	Turkey
France	New Zealand	United Kingdom
Germany	Norway	U.S.A.
Hungary	Poland	U.S.S.R.
India	Portugal	Yugoslavia
Iran	Romania	

No Member Body expressed disapproval of the Recommendation.

The Member Body of the following country disapproved the transformation of ISO/R 903 into an International Standard :

Egypt, Arab Rep. of
