## FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 4281 was developed by Technical Committee ISO/TC 47, *Chemistry*, and was circulated to the member bodies in August 1975.

It has been approved by the member bodies of the following countries :

Belgium	India	Spain
Brazil	Israel	Switzerland
Czechoslovakia	Italy	Turkey
Egypt, Arab Rep. of	Mexico	United Kingdom
France	Poland	U.S.S.R.
Germany	Romania	
Hungary	South Africa, Rep. of	

No member body expressed disapproval of the document.
