Sodium hexafluorosilicate for industrial use — Determination of phosphate content — Molybdovanadate spectrophotometric method

*Hexafluorosilicate de sodium à usage industriel — Dosage des phosphates — Méthode spectrophotométrique
au molybdovanadate*

First edition — 1978-10-01

OCT 16 1978

UDC 661.488 : 546.185 : 543.42

Ref. No. ISO 5440-1978 (E)

Descriptors: chemical compounds, sodium fluorosilicates, chemical analysis, determination of content, orthophosphates, spectrophotometric analysis.

ISO 5440-1978 (E)

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 5440 was developed by Technical Committee ISO/TC 47, *Chemistry*, and was circulated to the member bodies in July 1976.

It has been approved by the member bodies of the following countries :

Belgium	India	South Africa, Rep. of
Brazil	Israel	Spain
Chile	Korea, Rep. of	Switzerland
Czechoslovakia	Mexico	Thailand
Egypt, Arab Rep. of	Netherlands	Turkey
France	Philippines	United Kingdom
Germany	Poland	U.S.S.R.
Hungary	Romania	Yugoslavia

No member body expressed disapproval of the document.
