

American National Standard

common name for the pest control chemical
2-methyl-2-(methylsulfonyl)propanal O-[(methylamino)carbonyl] oxime
"aldoxycarb"

Approved July 17, 1978

Secretariat: U.S. Department of Agriculture

Page 1 of 2 pages

1. Common Name: aldoxycarb

1.1 The word "aldoxycarb" (pronounced al-däk-sē-kärb) has been accepted as the American National Standard Common Name for the chemical 2-methyl-2-(methylsulfonyl)propanal O-[(methylamino)carbonyl] oxime.¹

1.2 Acceptance signifies compliance with American National Standard Procedure for the Acceptance of an American National Standard Common Name for a Pest Control Chemical, K62.1-1974.

2. Use of Common Name

2.1 The common name applies to the 100% pure chemical.

2.2 Technical grades and formulations shall indicate the percentage of aldoxycarb present; for example, aldoxycarb — 99% minimum.

2.3 The Sponsor² of the common name "aldoxycarb" has agreed to release and permit the use of the name

¹ Also known as 2-methyl-2-(methylsulfonyl)propionaldehyde O-(methylcarbamoyl)oxime.

² Name furnished upon request.

"aldoxycarb" with respect to any product, whether or not manufactured or formulated by it, which contains a pest control chemical conforming to the description set forth in this American National Standard.

3. Limitations

Neither the American National Standards Institute nor its committee guarantees or assumes any responsibility that use of this name in connection with this or any other chemical or product will not infringe on or conflict with any existing proprietary name, trademark, or trade name. Approval as an American National Standard Common Name constitutes recognition by the Standards Institute that a consensus exists within a representative committee, operating under Institute procedures and basing its recommendation on data submitted by a Sponsor, favoring consideration of the use of the name to designate the pest control chemical described herein by all interested persons. The information concerning the chemical and physical properties of the chemical is not a part of the standard but is provided solely as an aid to identification, and the Standards Institute does not guarantee its accuracy.
