

Assembled joints between fittings and polyethylene (PE) pressure pipes — Test of resistance to pull out

Assemblages entre raccords et tubes sous pression en polyéthylène (PE) — Essai de résistance à l'arrachement

First edition — 1976-06-01

UDC 621.643.29 : 678.742.2 : 620.176.25

Ref. No. ISO 3501-1976 (E)

Descriptors : plastic pipes, polyethylene, pipe fittings, pressure pipes, pipe joints, tests, tension tests, pull out tests.

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 3501 was drawn up by Technical Committee ISO/TC 138, *Plastics pipes, fittings and valves for the transport of fluids*, and circulated to the Member Bodies in June 1974.

It has been approved by the Member Bodies of the following countries :

Australia	Ireland	Spain
Austria	Israel	Sweden
Belgium	Italy	Switzerland
Chile	Mexico	Turkey
Czechoslovakia	Netherlands	United Kingdom
Denmark	Norway	U.S.A.
Finland	Poland	U.S.S.R.
France	Portugal	Yugoslavia
Germany	Romania	
India	South Africa, Rep. of	

No Member Body expressed disapproval of the document.
