

INTERNATIONAL STANDARD

ISO 15512

First edition
1999-07-01

Plastics — Determination of water content

Plastiques — Dosage de l'eau

Reference number
ISO 15512:1999(E)

Contents

1 Scope	1
2 Normative references	1
3 Method A — Extraction with anhydrous methanol	2
4 Method B — Water vaporization.....	4
5 Method C — Manometric method.....	8
6 Test report	12

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 15512 was prepared by Technical Committee ISO/TC 61, *Plastics*, Subcommittee SC 5, *Physical-chemical properties*.
