INTERNATIONAL STANDARD

ISO 6502

Third edition 1999-12-01

Rubber — Guide to the use of curemeters

Caoutchouc — Guide pour l'emploi des rhéomètres

ISO 6502:1999(E)

Contents

1 Scope	
2 Normative references	1
3 Terms and definitions	1
4 Basic principles	2
5 Types of curemeter	4
6 Apparatus	4
7 Test piece	6
8 Vulcanization temperature	6
9 Conditioning	6
10 Test procedure	7
11 Expression of results	7
12 Test report	8
Annex A (informative) Effect of thermal parameters on measured cure properties	15
Annex B (informative) Particular requirements for oscillating-disc curemeters	18
Annex C (informative) Particular requirements for rotorless curemeters	19

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 6502 was prepared by Technical Committee ISO/TC 45, *Rubber and rubber products*, Subcommittee SC 2, *Physical and degradation tests*.

This third edition cancels and replaces the second edition (ISO 6502:1991), which has been technically revised.

Annexes A, B and C of this International Standard are for information only.
