Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 6844 was developed by Technical Committee ISO/TC 91, *Surface active agents*, and was circulated to the member bodies in March 1982.

It has been approved by the member bodies of the following countries :

Australia	Iran	Poland
Austria	Ireland	Romania
China	Italy	South Africa, Rep. of
Egypt, Arab Rep. of	Japan	Spain
France	Korea, Rep. of	Switzerland
Germany, F. R.	Mexico	United Kingdom
Hungary	Netherlands	USSR

The member body of the following country expressed disapproval of the document on technical grounds :

Belgium
