Steel and cast iron — Determination of manganese content — Spectrophotometric method

Aciers et fontes — Dosage du manganèse — Méthode spectrophotométrique

First edition — 1982-11-15

UDC 669.13/.14 : 543.42 : 546.711

Ref. No. ISO 629-1982 (E)

Descriptors : steels, cast iron, chemical analysis, determination of content, spectrophotometric analysis.

Price based on 4 pages

ISO 629-1982 (E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 629 was developed by Technical Committee ISO/TC 17, *Steel*.

It was submitted directly to the ISO Council, in accordance with clause 5.10.1 of part 1 of the Directives for the technical work of ISO. It cancels and replaces ISO Recommendation R 629-1967, which had been approved by the member bodies of the following countries :

Australia	Hungary	South Africa, Rep. of
Austria	India	Spain
Belgium	Israel	Sweden
Brazil	Italy	Switzerland
Canada	Japan	Turkey
Chile	Korea, Rep. of	United Kingdom
Czechoslovakia	Netherlands	USA
Denmark	New Zealand	USSR
Egypt, Arab Rep. of	Norway	Yugoslavia
France	Poland	
Germany, F. R.	Romania	

The member body of the following country had expressed disapproval of the document on technical grounds :

Portugal
