**Abrasive grains and crude — Chemical
analysis of silicon carbide**

*Abrasifs en grains ou en roche — Analyse chimique du carbure
de silicium*

Reference number
ISO 9286:1997(E)

	Page
Contents	
1 Scope	1
2 Normative reference	1
3 Analysis of surface impurities	1
3.1 Sampling	1
3.2 Preparation of sample	2
3.3 Determination of surface silicon (Si_{surf})	2
3.4 Determination of surface carbon (C_{surf})	4
3.5 Determination of loss on acid treatment (LAT)	9
3.6 Determination of surface silicon dioxide ($\text{SiO}_{2\text{surf}}$)	10
3.7 Calculation of the content of residual silicon carbide (SiC_R) ..	11
3.8 Determination of surface iron (Fe_{surf})	12
3.9 Determination of surface iron by atomic absorption spectrometry (AAS)	13
3.10 Determination of surface aluminium oxide ($\text{Al}_2\text{O}_{3\text{surf}}$)	15
3.11 Determination of surface aluminium oxide by atomic absorption spectrometry (AAS)	15
3.12 Determination of surface calcium oxide (CaO_{surf}) and of surface magnesium oxide (MgO_{surf})	15
3.13 Determination of surface magnesium oxide (MgO_{surf}) and of surface calcium oxide (CaO_{surf}) by atomic absorption spectrometry (AAS)	17
4 Determination of silicon carbide (SiC) in crushed silicon carbide ..	17
4.1 Principle	17
4.2 Preparation of sample	17
4.3 Determination of total carbon (C_{total})	18
4.4 Determination of free carbon (C_{free})	20
4.5 Calculation of the silicon carbide (SiC) content	20
5 Test report	20
Annexes	
A Other methods of analysis	21
B Permissible deviation as a result of variations in the measuring technique for the chemical analysis of silicon carbide	22

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 9286 was prepared by Technical Committee ISO/TC 29, *Small tools*, Subcommittee SC 5, *Grinding wheels and abrasives*.

Annexes A and B of this International Standard are for information only.
