# Electric cables — Accessories — Bitumen-based filling compounds

ICS 29.035.99; 75.140

## Committees responsible for this British Standard

The preparation of this British Standard was entrusted by Technical Committee GEL/20, Electric cables, to Subcommittee GEL/20/7, Cable joints and terminations, upon which the following bodies were represented:

- BEAMA Ltd — BECCAMA — Electrical
- BEAMA Ltd — EIEMA — Electrical
- British Approvals Service for Cables
- British Cables Association
- Electricity Association
- ERA Technology Ltd
- Institution of Lighting Engineers
- London Underground Ltd
- Railway Industry Association
- Co-opted members

This British Standard, having been prepared under the direction of the Electrotechnical Sector Policy and Strategy Committee, was published under the authority of the Standards Policy and Strategy Committee on 14 February 2002

© BSI 14 February 2002

BS 688 first published  
December 1936  
BS 803 first published May 1938  
First revision combining both standards June 1952  
Second revision April 1957  
Third revision October 1973  
Fourth revision February 2002

Committees responsible	Inside front cover
Foreword	ii
<hr/>	
1 Scope	1
2 Normative references	1
3 Classification	1
4 General requirements	2
5 Solubility	2
6 Softening point	2
7 Penetration	2
8 Viscosity of Class I compounds	2
9 Pouring point of compounds of Classes II to V	2
10 Electric strength (proof) test	3
11 Flash point (open)	3
12 Mineral matter (ash)	3
13 Acidity: neutralization value	3
14 Freedom from injurious sulfur	3
15 Adhesive properties	3
16 Contraction and depth of pipe	3
<hr/>	
Annex A (normative) Pouring point of compounds of Classes II to V	4
Annex B (normative) Electric strength (proof) test	10
Annex C (normative) Injurious sulfur	11
Annex D (normative) Adhesive properties	11
Annex E (normative) Contraction and depth of pipe	14
<hr/>	
Bibliography	16
